Setting up Trading View charts Tips & Tricks

The video is describing many interesting features one can use in Trading View. Purely based on my own experience and features I'm using every day again. The video and this download file is just to give you an idea about features you might not know yet. Not describing every available feature as many are quite clear what their function is and how to use them.

I hope it helps!

Switching to Dark Color theme

A screenshot of a trading platform interface. The top bar shows four tabs for BTCUSD with prices: 64404.19, 64370.38, 64404.19, and 64370.38. Below the tabs is a menu with options: W M, a vertical line icon, a plus icon, Compare, Indicators, Financials, and Temp. The main area displays a candlestick chart with a price of 4774.25, a high of 65450.70, a low of 62278.00, and a current price of 64370.38, with a change of -418.32 (-0.65%). On the left, a settings menu is open, listing options like Save layout, Autosave, Sharing, Rename..., Make a copy..., Export chart data..., Quick search..., Crypto_Ed (Premium), Help Center, What's new, Home, More, Dark color theme, Drawings panel, Language, and Keyboard Shortcuts. The 'Dark color theme' option is highlighted with a white circle, and its toggle switch is turned on. The 'Drawings panel' option is also highlighted with a white circle, and its toggle switch is turned on.

Change back ground / grid lines

A screenshot of a trading software interface showing the 'Chart settings' dialog box. The 'Appearance' tab is selected and highlighted with a yellow circle. The 'Background' is set to 'Solid' with a black color swatch also circled in yellow. The 'Vert Grid Line' and 'Horz Grid Lines' options are both checked with a grid pattern swatch, also circled in yellow. The background of the chart area is black, and the candlesticks are colored in red, yellow, and green. The dialog box includes various other settings like 'Scales text', 'Scales lines', 'Crosshair', 'Watermark', 'Navigation Buttons', 'Pane Buttons', and 'Margins'.

A screenshot of a trading chart interface. A candlestick chart is shown with a dotted trend line drawn across it, labeled "test" in red. A settings dialog box titled "Trend Line" is open in the foreground, showing the "Visibility" tab. The dialog has tabs for "Style", "Text", "Coordinates", and "Visibility". Under "Visibility", there are checkboxes and sliders for various time intervals: Seconds (checked, 1), Minutes (checked, 1), Hours (checked, 1), Days (checked, 1), Weeks (unchecked, 1), Months (unchecked, 1), and Ranges (checked). A "Template" dropdown is at the bottom left, and "Cancel" and "Ok" buttons are at the bottom right.
